

Stewards of the White Oak River Basin

2003-08-06 NORTHEAST CREEK BY DALE WESTON

PAGE 1 OF 4

Well, Tom Hill and I had a nice paddle and avoided rain while on the water. We met at the McDonald's at Hwy 24 and Western and drove onto Tarawa Terrace (TT) Housing area and got to the launch ramp that is about 200 yards up stream from the creek Elmer talked previously. We paddled to the mouth of Northeast Creek, but not quite to the tip on the northern shore. We then paddled back to the starting point with stops to pick up trash and explore.

This is a very scenic paddle for being open water. The shore is mostly sandy with lots of driftwood, flowers, and more birds than I have seen for a while.

A future trip will include staging a vehicle at the TT launch ramp and then putting in at the Camp Johnson BOQ.

Hope to see you next time, Dale
